Technology at work for you

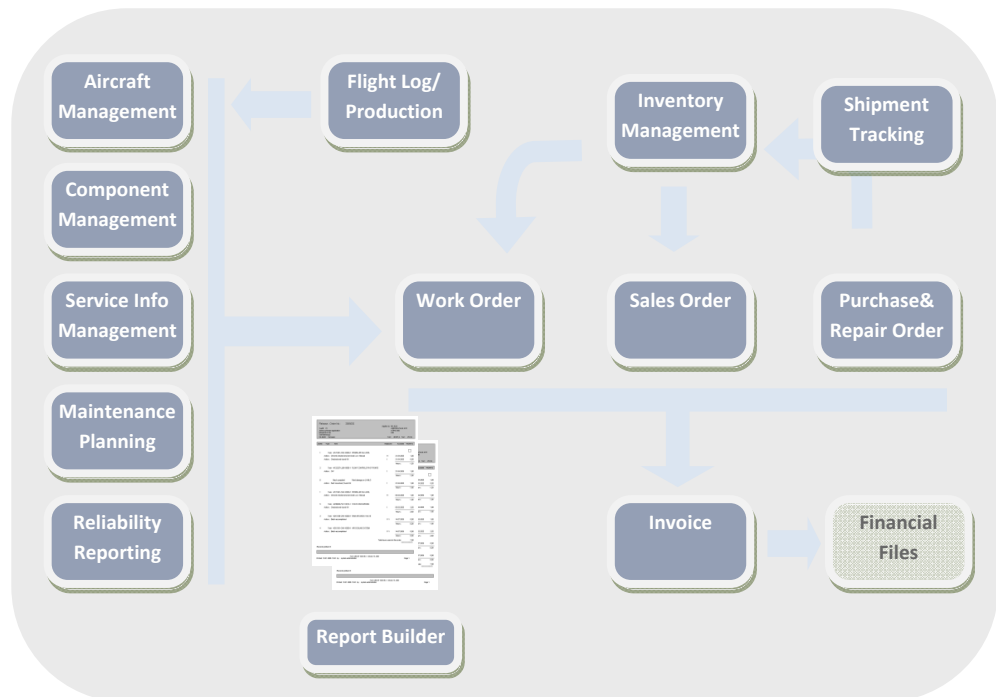

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

Airline software Application has been creating aircraft maintenance solutions for more than 20 years. Today, our extensive set of maintenance management solutions are based on the renowned SAM system.

SAM (System Aircraft Management) is an Easy-to-Use Software suite, making aircraft maintenance time saving and cost effective and provides aircraft operators and MRO's with all functionality needed to fully manage

their Aircraft, Components, AD notes & Service Bulletins, Maintenance Tasks, Work Orders, Sales and Invoicing, Inquiry and Purchase and Reliability reporting. SAM's modularised structure allows you to include only the functionality needed by selecting the corresponding SAM modules. In all settings, SAM is the optimal tool to comply with the rules set forth by aviation authorities (JAR OPS 1 & 3 / EASA Part 145/M Subpart F, G).

flexible solutions for your maintenance needs

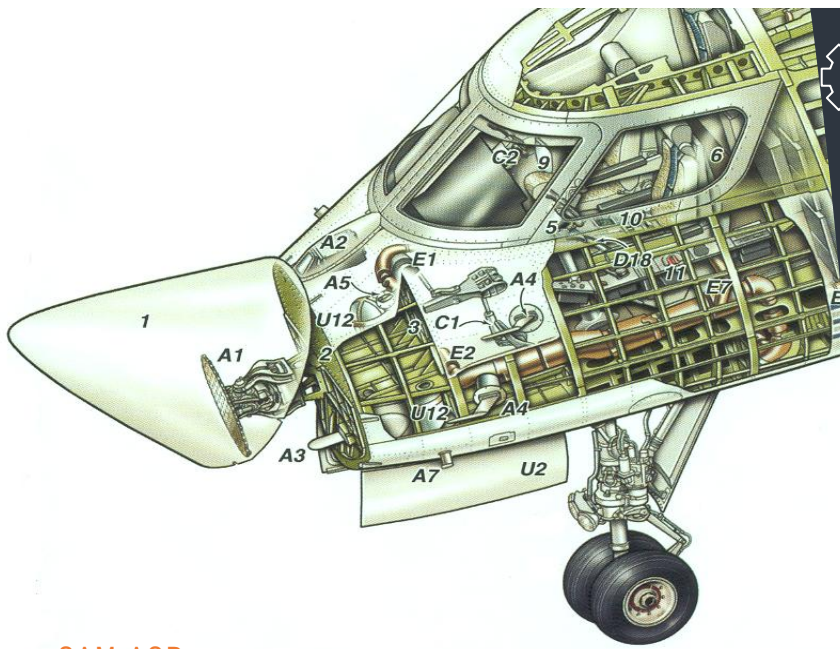

AN INTEGRATED SOLUTION IN ONE SYSTEM

In addition to being easy-to-use and cost-efficient, SAM is structurally integrated. This means you can control an extensive range of maintenance planning and production functions as well as inventory, purchasing and invoicing functions, all with one system. AND, all SAM modules are inter-connected sharing their information.

THE BENEFITS YOU GET WITH SAM...

- ✓ Replace multiple systems by using one integrated system – Centralize your data
- ✓ Improve Credibility / Reputation at your aviation authority, customers and partners
- ✓ Increased aircraft uptime – on time delivery of serviceable aircraft & components
- ✓ Time savings on work procedures (order creation, work preparation, file updates, etc.)
- ✓ Instant access to archives and history of AC, Components, task compliance and parts
- ✓ Reduce cost on AOG's and daily parts ordering
- ✓ Increase control on your costs by detailed cost reporting
- ✓ and more...

AVAILABLE SAM SOLUTIONS:

The **SAM-Lite**[®] system has been specially developed for general aviation maintenance management. This system still has the great SAM functionality but without the more complex features commonly used for maintenance management of larger aircraft.

The **SAM-Ops**[®] system IS THE solution for maintenance management by sole Aircraft Operators out-contracting their maintenance. This system includes a selection of SAM modules typically for recording and tracking for maintenance requirements as well as handling Service Information (AD/SB) and Complaints (including MEL, etc).

The **SAM-Ops+**[®] system has been specially developed for maintenance management by Regional Aircraft Operators. This system includes a selection of SAM modules typically for recording and tracking maintenance requirements as well as handling Service Information (AD/SB) and Complaints (including MEL, etc), create Work-Orders and AMP reliability reports.

The **SAM-MRO**[®] system includes the modules specially developed for managing work shop and hangar activities. This system enables you to handle work-orders, record man-hours and parts used, issue release certificates, manage inventory, create invoices and many more.

The **SAM-STORE**[®] system includes the modules specially developed for managing aviation parts distribution. This system enables you to handle Purchase-, and Sales-orders, send out quotations, create invoices and many more.

The **SAM-Enterprise**[®] system includes the full module package and has been specially developed for Complete Aircraft Maintenance Management. This system is suitable for Aircraft operations doing their maintenance in-house (including third party maintenance), keep their own Parts Inventory(Including sales to third parties) and have their own repair shops.

SAM-ASP

The SAM System also comes as an ASP (Application Service Provider) Solution. This enables you to rent the system.

The benefits of the SAM-ASP Solution is that you don't have any investment outlay in hardware and software; you don't need to consider security issues and backups and your system is available to you from around the world using the Internet.

THE SAM-ASP SOLUTION SUMMARIZED...

- ✓ We take over the full responsibility for managing the hardware
- ✓ The software is always up to date to the latest version
- ✓ Back-ups are made on a daily basis
- ✓ Your data is available 24 hours a day, 365 days a year
- ✓ You do not have any investment outlay in hardware and software
- ✓ Your data can be accessed globally thru an Internet connection
- ✓ Support is easy and problem solving can be done instantly
- ✓ Your data is secured with the newest antivirus and firewall facilities

IMPLEMENTATION GUIDANCE

Purchasing a software system is in most cases the easy part of the implementation. Success is based on a carefully designed and followed implementation plan. We at ASA believe implementation guidance is vital to your success and therefore we are happy to share our experience and expertise showing you the shortest way to efficiency in your maintenance organization.

THIS IS WHAT OUR CLIENTS SAY ABOUT SAM...

"...After a very frustrating period, where we tried to implement a computerized system for our helicopter maintenance with very little help from our previous supplier, it has been a pleasure to experience the skill and commitment of the SAM implementation staff from ASA..."

Arne Lange, Maintenance Manager DanCopter

"...We ended up with SAM from ASA as we were convinced that they had exactly what we were looking for..."

Susanne H. Lastein, Managing Director DanCopter

"...During summer and fall 2003, we contacted ASA for discussions regarding reliability reporting. The Reliability Reporting module has since then been a milestone for the Maintenance Review Board meetings with our Aviation Authority 3-4 times per year..."

Jan Fauerskov, Maintenance Coordinator and Reliability Supervisor Danish Air Transport:
